DETAILED ACTION

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. Makise et al. (US Patent 5876647) teaches a method of masterbatching conductive carbon black and thermoplastic resin and adding said masterbatch into another thermoplastic resin. The reference, however, is silent with respect to the blend morphology of the composite and it would not have been obvious to modify the art to achieve the discontinuous and continuous phases as required by Claim 23. Coran et al. (US Patent 4173556) teaches elastoplastic compositions of rubber and polyamide wherein the rubber can be a dispersed phase present in a matrix of polyamide and additionally carbon black can be masterbatched with the rubber prior to addition into a polyamide matrix. However, the reference is silent with respect to levels of conductivity and it would not be obvious to modify the reference to add conductive filler that is sufficient for electrostatic painting applications as required by Claim 23. Miyoshi et al. (US Patent App. Pub. No. 2003/0134963) along with numerous references teaches a composite which meets the general limitations of Claim 23, however, requires polyphenylene ether

in the thermoplastic matrix which has been excluded by Applicants' amendment of the transitional phrase to "consisting of".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
